

Fig. 1

2

OPERATIONAL ISSUES

Operations:

1. Is process currently in-house or outsourced?
☐ In-house ☐ Outsourced
2. Number of full time equivalents (FTE)? _____
3. Number of locations (if more than one)? _____
 If multi-locations, is there a central processing center? ☐ Yes ☐ No
 If yes, location? _____
4. Are images being transmitted to other carriers?
☐ Yes ☐ No If yes, which carriers?

5. Application volumes: How many transactions are processed in a given period on the average, minimum and maximum at peak times - in day, hour, month, and year?
 • Total year: _____
 • Highest month: _____
 • Lowest month: _____
6. Product applications to be imaged (ie Term, UL, LTC, Annuities...)?

7. Are procedures documented? ☐ Yes ☐ No
 If yes, attach copy.
8. Transmission time requirements (ie. Continuous, scheduled times....)?

9. Management reporting needs?

10. How are test plans developed and monitored?

11. What are your paper retention guidelines?

12. Will there be a dedicated project manager assigned to work with us? ☐ Yes ☐ No

Please attach:

- ☐ Overall business process map showing where this process fits in
- ☐ High level process map for this process
- ☐ Detailed process map including time required for each step (if available)
- ☐ Information flows – including potential locations of inputs, description of input, ...
- ☐ Examples of inputs and outputs (ie application forms, reports...)

11. Check off the current document types to be imaged:

- ☐ Application
- ☐ Part 2
- ☐ Admin Forms
- ☐ Correspondence
- ☐ Checks
- ☐ Delivery Requirements
- ☐ Illustration
- ☐ Compliance Requests
- ☐ 1035 / Tax
- ☐ Collateral Assignment
- ☐ Questionnaire
- ☐ Financial Information
- ☐ Single Case Agreement
- ☐ APS
- ☐ Lab Tests
- ☐ EKG
- ☐ Inspections
- ☐ MVR
- ☐ Lab Receipt

*Note: Most offices use only 7 or 8 standard document types.
 NAILBA work type standards are included in our I-Scan
 Solutions Guide.*

Fig. 3B

OPERATIONAL ISSUES

Measurements:

1. What are current cycle time measurements around this process (i.e. Date application signed, to date sent to carrier, to date policy settled)?

2. What are the quality measurements around this process?

3. For each measurement, what is the current level of performance (average/range)?

4. Current defect types and any available statistics?

5. What are current controls in place around process quality?

6. How are defects presently identified?

7. What is the process to correct defects?

8. What are current losses incurred as a result of defects?

9. What is the ideal benchmark for this process?

10. What are your expectations for quality level/improvements?
 - Cost savings

 - Quality improvements

 - Speed/timeliness

 - Accuracy

 - Volume handling capacity

 - Customer service

 - Management reporting

Please attach examples of reports if available.

Fig. 3C

TECHNICAL ISSUES

1. Hardware to include Model, make and operating system software of mainframe/mini-workstations, and all other dedicated equipment (i.e. fax servers, printers, etc)

7. Typical types of transactions/work performed on the system?

8. Do other groups within the organization use the existing system for other applications? If yes, how many users are there on other applications, and how many for this process?

2. Are intelligent workstations at user desks? Or, are dumb terminals used?

3. Do you have a disaster recovery plan?

☐ Yes ☐ No

4. What is retention cycle?

9. What is the performance/response time of the applications used?

5. Do you have a capacity plan? ☐ Yes ☐ No

6. Number of users on the system?
Average/minimum peak periods?

10. What type of network is used in the organization?

11. What network is used for the systems involved in this process?

TECHNICAL ISSUES

- NOTES:

[illegible]This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
